

BACKOVER INJURIES

Always Know the Back-Up Plan

TO PREVENT BACKOVER INJURIES AND DEATHS, KEEP THESE GUIDELINES IN MIND:

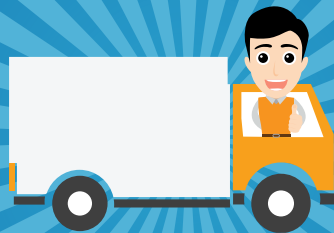

Wear appropriate high-visibility personal protective equipment

Know the blind spots of vehicles and equipment you work near

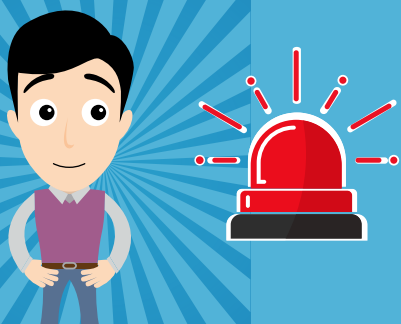

Never approach equipment or vehicles without a clear signal from the operator

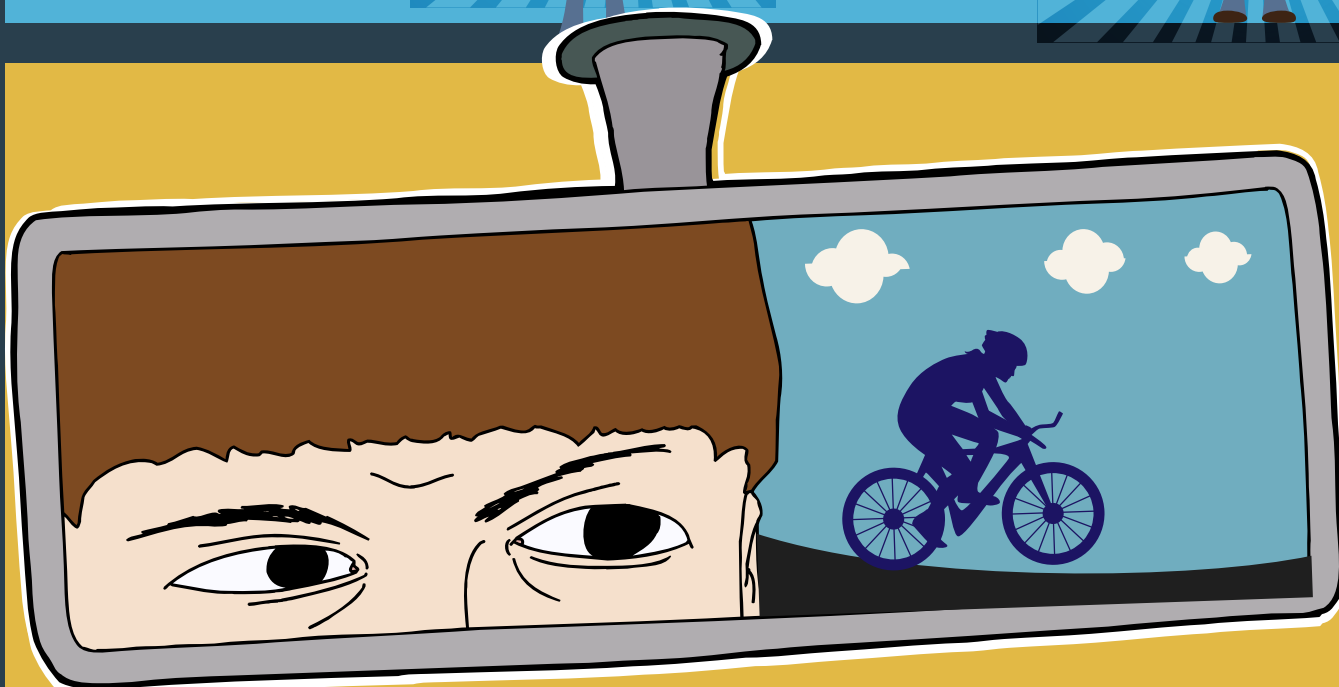

Avoid areas where vehicles and equipment travel

Stay alert for the sound of reversing alarms

Avoid complacency – always be aware of your surroundings

Over 70 people died from backover injuries in 2011.¹
